PROFESSIONAL SUMMARY

Fullstack developer and Co-Founder/CTO of Viafocus, an ALMI-backed EdTech startup with an active pilot deployment in a Swedish school and 45 qualified leads from Sett mässan 2026. Production experience with Node.js, React, TypeScript and PostgreSQL, with AI tooling (Claude Code, Cursor, Copilot) as a core part of daily workflow. Comfortable across the full stack and with direct customer contact. BSc Software Engineering, Chalmers/GU (2025).

EXPERIENCE

Co-Founder & CTO — Viafocus (ALMI-backed EdTech startup)

Jan 2024 – Present

- **Built and shipped a full production platform end-to-end** — Node.js backend (4 microservices on Encore.ts, 4 PostgreSQL databases), React frontend, real-time features (WebSockets, CRDT/Yjs). Currently running an active pilot at a Swedish school with daily user load.
- **Work AI-first daily** — Claude Code, Cursor and Copilot as core part of my workflow; integrated GenAI directly into the product (LLM-assisted teacher and student tooling). AI is how I move fast without compromising quality.
- **Direct customer contact end-to-end** — gathered requirements directly from teachers and school leadership, generated 45 qualified leads at Sett mässan 2026 (Stockholm), and led pilot conversations from first contact to deployment.
- **Built API integrations and third-party connections** — REST APIs across services, WebSocket integration with a custom C#/.NET Windows Service running on student devices, third-party LLM API integrations.
- **Selected for ALMI national innovation program**. Own architecture, CI/CD (Docker, GitHub Actions), deployment, monitoring, and team coordination.

Mobile Developer Intern — Cirkly

Jan 2025 – Jul 2025

- **Built cross-platform React Native fintech app** enabling real-time financial collaboration; developed secure RESTful APIs for transaction flows. Agile Scrum delivery with Jira.

Teaching Assistant — University of Gothenburg

Aug 2024 – Nov 2024

- **Tutored students in web development** (JavaScript, HTML, CSS); debugged responsive design and API integration issues across student projects.

Software Developer Intern — Luday

Mar 2024 – Jun 2024

- **Built internal dashboard** (React, Next.js, Flask) replacing a paid third-party tool, eliminating subscription costs and consolidating internal workflow.

Software Developer (Freelance) — Algebraskolan

Jun 2023 – Jun 2024

- **Built and shipped a Flutter + Firebase platform** serving 300+ daily active users, published to App Store and Google Play. Drove ~20% operational efficiency improvement by digitizing a previously manual workflow. Direct client relationship throughout.

SELECTED PROJECT

TalkLink — Real-time Chat with AI Translation — Personal Project

2023

- **Real-time chat with AI-powered translation** (Google Translate API). Node.js + MongoDB backend on AWS EC2 with JWT authentication and persistent chat history.

EDUCATION

BSc Software Engineering and Management — Chalmers / University of Gothenburg

2022 – 2025

Bachelor's Thesis: ML Robustness & Data Quality Engineering (Python). Coursework: Software Architecture, Software Quality & Testing (Pass with credit), Distributed Systems, Databases, Algorithms.

TECHNICAL SKILLS

Primary Stack: Node.js, React, TypeScript, JavaScript, Next.js, PostgreSQL, REST/GraphQL APIs

AI Tooling: Claude Code, Cursor, Copilot — daily; LLM API integration in production

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, GitHub Actions, CI/CD, Git, Linux

Other Tech: C#/.NET (production), Python, MongoDB, Firebase, React Native, Flutter
